

Player Injury Report System/IRS

(only one injury/form)

Injury Definition

The definition of an injury in the IIHF Injury Reporting System is as follows

- An injury is considered reportable if a player misses a practice
 or a game because of an injury sustained during a practice or a game
- 2. The player doesn't return to the play for the remainder of the game following an injury
- 3. All concussions
- 4. Any dental injury
- 5. Any laceration which requires medical attention
- 6. All fractures
